### StackOverflow

<https://stackoverflow.com/users/7774308/yogesh-kathayat>

## Skills

Node.js, TypeScript

MongoDB, PostgreSQL, MySQL Databases

Web Technology (Javascript, Socket.io, ES6, HTML5, CSS3, Bootstrap etc)

Angular

ReactJs, Redux

DevOps (Ansible, Docker, Kubernetes, Jenkins, Git, AWS)

Redis, RabbitMQ, Elastic Search

Blockchain (Ethereum, Bitcoin, Hyperledger Fabric)

## Other Skills

Python, Java, Shell Scripting

Hypervisors (Hyperv, Vmware Esxi)

Architecture – Microservices, REST

Data Structures And Algorithms

Extensive experience with Linux (Ubuntu preferred)

Web Servers – Nginx & Apache web servers

Repository & Version Management - GitHub, GitLab, Bitbucket

Project Management Tools - JIRA, Trello

## Summary

- IT professional having 4+ years of experience as a Full Stack and Blockchain Developer with expertise in developing products, software solutions and Blockchain solutions. Involved in end to end development of multiple projects including Analysis, Design / Architect, Development, Testing, Debugging, Deployment, Release and Support Phases.

## Experience

2019-06 - present

### Full Stack Developer

StorIT Distribution fzco

- Worked closely with Technical Director to develop and implement automation solutions.
- Develop and deliver high quality automation and provisioning application ( OpsAlliant ) .
- Researched, designed and implemented Asset Management application from scratch using Node.js, Ansible, Postgresql, Python, Docker and Angular 5.

2018-04 - 2019-05

### Module Lead

Block Gemini Technologies FZ LLC, Dubai (UAE)

- Worked closely with CBO and Architects to develop and implement Blockchain solutions.
- Lead the development of a Blockchain based Supply Chain Logistic application & Crypto Wallet and Chat application
- Researched, designed and implemented scalable blockchain applications using Node.js, Angular, React, Docker, Java, Ethereum and Hyperledger Fabric.
- Closely worked with core engineering to productize many of the best practices adopted for continuous integration, deployments (CI-CD) and application migrations using Docker, Jenkins, AWS, Kubernetes, Git, Bitbucket
- Delivered end to end solution by ensuring high performance on mobile and desktop
- Have shown leadership skills by mentoring & facilitating knowledge sharing with colleagues on various technologies
- Worked on Blockchain projects like Crypto wallets, Supply Chain Management, Cross border payment platforms, Derivative trading, Blockchain on-demand Loyalty point, ICOs
- Awarded with Star Employee of the Month award working in Innovation Lab.

2016-01 - 2018-03

### Software Engineer

Infogain India Pvt. Ltd. Noida (India)

- Implemented Elastic Search, Rabbitmq and Redis cache to improve the performance of Online learning and assessment platform - MYPAT which increased the performance by 75%
- Automation of Invoicing and Reporting modules for FIITJEE - a chain of major educational institute in India.
- Worked in Agile/Scrum project management methodology
- Designed and implemented low-latency, high-availability, and performant applications in Angular and Node.js
- Gained domain experience in Edtech, Enterprise, E-Commerce, Insurance and Finance, Banking
- Experienced in working on client location
- Worked on many open source technologies like Blockchain, JavaScript , popular frameworks and libraries like Angular, Node.js, React.js
- Awarded with Budding Engineer Award.

## Certificates

- 2018 IBM Blockchain Essentials by IBM
- 2018 Machine Learning by Stanford University
- 2017 Server side development with NodeJs by The Hong Kong University of Science and Technology

## Education

- 2013 - 2016 **Master of Computer Applications, Birla Institute of Applied Sciences (India)**
  - Developed Library Management System and OPAC for college Library.
- 2011 - 2013 **Bachelor of Computer Applications, Kumaun University (India)**
  - Worked as a freelancer Web designer, created multiple web applications
